DESIGN AND PRODUCTION OF PLASTIC PRODUCTS,
INJECTION MOLDS AND DIES

ENVIRONMENTAL POLICY

Arexim Engineering EOOD develops and produces plastic products, injection mouldings and dies. Main target in the policy of the management team is to strive for quality improvement of the products, satisfaction and compliance with the requirements of our clients as well as conformity with the local, national and international requirements concerning the environment protection.

Arexim Engineering EOOD provides high quality services using practices that ensure safe and healthy work environment for our employees and that reduce the environment influence. In order to work in an ecologically clean work environment we define the following principles:

- Conformity with the legislation and regulations to protect the environment, safety and health of our employees and customers.
- Motivation of the employees, education and training, improvement of the work environment
- Efficient use of resources and materials, improving of the recycling system and re-used materials
- Monitoring and reduce waste, emission and pollution using recyclable raw materials
- Using techniques and production methods that reduce the environmental influence
- Monitoring and management of the production and trade activities in order to optimise the resources used
- Placing requirements regarding the environment protection to the suppliers, clients and other interested parties
- Creating systems and programs to develop, implement and review the present environmental policy and making it accessible to the employees of the company, the clients and the public society.

The management team of Arexim Engineering EOOD strives for continual improvement of the environmental management system and the ecologic status of the company and the area by communicating information with the employees to increase the realization of the effect of their activities, their competence and responsibility to protect the environment.
